WHAT IS A DATA CENTER? A **data center**, also called a server farm, is a facility used to house computer systems and associated components, such as telecommunications and storage systems. It generally includes redundant or backup power supplies, redundant data communications connections, environmental controls (e.g., air conditioning, fire suppression) and security devices.

CIS application hosting services allows you to focus on your important day to day tasks instead of focusing on IT.

DATA CENTER SECURITY

PHYSICAL SECURITY

- Access limited to security-cleared individuals
- Biometric security / photo ID badge system
- 24/7 on-site staffing
- 24/7 video surveillance
- Perimeter fencing around site

ELECTRONIC SECURITY

- Hardened OS system with ongoing patch maintenance
- Dedicated firewall
- Independent security audits
- Full N+1 redundancy
- Redundant ISP service providers

OPERATIONAL SECURITY

- Employees trained on security and privacy procedures
- Restricted access to confidential information
- Internal audit systems employed
- Document shredding for hard copy documents
- Disaster recovery training

CIS X-Helion Data Center
